# YOUR INSIGHT. OUR INNOVATION. SHARED SUCCESS.

STRONGER EMERGENCE

HEAVIER TEST WEIGHTS

HIGHER YIELDS

BANKABLE PROFIT

# GMO FREE 2026 SEED SELECTOR

At Kentland Seeds, our commitment has always been to farmers. We are dedicated to providing the highest-quality products and the personal service you need to maximize the success of your operation. That commitment is what drives the continued growth and innovation behind our Spectrum NON-GMO brand.

Spectrum NON-GMO represents the best of what we believe in:

- Top-of-the-line genetics for strong agronomic performance
- Excellent emergence and vigor for a healthy start
- High seed quality that meets the strictest standards
- Organic options to support your growing practices and certifications
- Personalized agronomic support from our dedicated seed agronomist

Whether you're planting conventional NON-GMO or certified organic, Spectrum NON-GMO is built to deliver performance you can count on—and the service you expect from a team that puts farmers first.

As we move forward, we remain focused on supporting farmers across the country with the same high standards and trusted service we're known for. Your voice, your feedback, and your partnership shape how we grow—and together, we continue raising the bar.

Thank you for trusting us to be part of your success. We look forward to working with you this season and beyond.

# TESTIMONIALS & DETAILS

## CUSTOMER TESTIMONIAL

DAVE ALME, ALME BROS DAIRY FARM  
STROUGHTON, WI

I've been planting Spectrum seed for about eight years now, and it's been one of the best decisions I've made for my farm. I first started looking for a new seed company after getting frustrated with my previous supplier — they were offering free seed to new customers, but nothing to long-time, early-paying growers like me. It felt like I was subsidizing someone else's deal. I saw an ad for Spectrum on DTN and decided to give it a try. That first season, I ran plots comparing Spectrum with some traited hybrids, and to my surprise, Spectrum consistently outyielded the higher-priced seed. What really sold me was the combination of excellent emergence, heavy test weight, and strong yields.

Spectrum has everything I need. Over the years, I've come to really trust the performance. I've also saved a lot by switching to Spectrum's Non-GMO hybrids, which has allowed me to put more into my fertility program — and that's helped push my yields and overall profitability even further. If you're considering trying Spectrum, my advice is simple: put it on your own farm and do your homework on your herbicide program. If you get that right, you'll be set up for success.

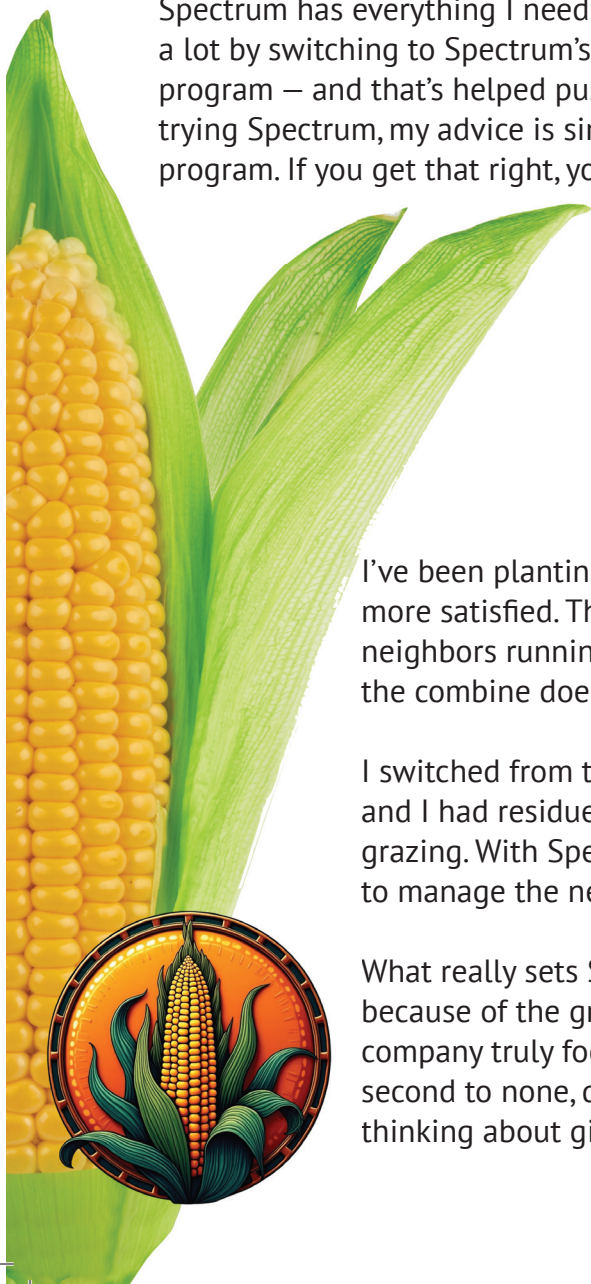

## CUSTOMER TESTIMONIAL

LEONARD HIGH, L HIGH FARM  
NEWVILLE, PA

I've been planting Spectrum Non-GMO corn for over six years now, and I couldn't be more satisfied. The test weights are excellent, and the yields stand toe-to-toe with my neighbors running traited hybrids. One of my top performers, 6416, tells its own story—the combine doesn't lie. Year after year, it delivers.

I switched from triple-stack corn years ago because the stalks just didn't break down, and I had residue issues—not to mention concerns with cattle digesting the stalks after grazing. With Spectrum's Non-GMO hybrids, the stalks decompose better, making it easier to manage the next crop.

What really sets Spectrum apart is purity. I'm earning a premium of .60 cents a bushel because of the grain quality. That's real money back in my pocket. It's hard to find a company truly focused on Non-GMO—and Spectrum gets it. The customer service is second to none, delivery is smooth, and I always feel like I'm taken care of. If you're thinking about giving Spectrum a try, stick your neck out—I did, and I'm sure glad I did.

# 2026 SEED SELECTOR

---

## SEED GENETICS

The Spectrum portfolio is the result of multiple breeding programs with diverse genetic potential. Products featured in the Spectrum portfolio have been evaluated on their performance in controlled Non-GMO environments.

---

## SEED TREATMENT

Unless you request untreated or organic products, your seed will come standard with CruiserMaxx Vibrance Corn Seed Treatment which offers insect and disease protection with enhanced root health.

---

## UNTREATED SEED

Place orders for untreated seed by November 1. If you need a Non-GMO certification letter, please let us know.

---

## SEED PACKAGING

Seed corn is packaged in either an 80K bag or Pro Boxes. Boxes must be returned.

---

## AGRONOMY SUPPORT

Available all season long from your Spectrum Non-GMO agronomist.

---

## PREFERRED GRAIN

All Spectrum Non-GMO hybrids are produced to be bagged at nearly 100% purity, eliminating any potential of in-bag contamination.
