

6257/ 112 Day NEW!

Placement Considerations

Silty Loam	9
Clay	8
Sand	8
Narrow rows	7
Corn After Corn	8
No Till	7

- Works best on silty loam, clay soils

- Best performance: on rotated ground, can be planted in low productive soils, moderate productive soils, and very high yield potential in highly productive soils.

Agronomic Highlights

Emerge	7
Early Vigor	7
Stalk Strength	7
Root Strength	7
Stay Green	8
Ear Type	FL

- Works best in lower to moderate planting populations with outstanding ear flex.

- Medium tall plant height with medium ear placement

Management Notes

Dry Down	7
Drought Tolerance	8
Test Weight	7
Fungicide Response	7
Silage	9

- Suitable for: Southern movement, silage, and will respond to higher management

- Disease Watch: Anthracnose and tar spot

- Recommend fungicide: if pressure is present

Disease Tolerance

Northern Leaf Blight	8
Gray Leaf Spot	8
Goss's Wilt	8

Special Features

- ✓ Identity Preserved Production

- ✓ Untreated Seed Available

- ✓ Plant Height Medium Tall
