

5675/ 106 Day

Placement Considerations

Silty Loam	9
Clay	8
Sand	8
Narrow rows	7
Corn After Corn	8
No Till	8

- Consistent performance across yield levels.

- Solid drought tolerance

Agronomic Highlights

Emerge	8
Early Vigor	7
Stalk Strength	8
Root Strength	8
Stay Green	8
Ear Type	S-FL

- Very good test weight

- Great top-end yield potential

Management Notes

Dry Down	8
Drought Tolerance	8
Test Weight	8
Fungicide Response	7
Silage	8

- Good performance at both lower and higher populations.

- Works well in corn-on-corn acres

Disease Tolerance

Northern Leaf Blight	8
Gray Leaf Spot	7
Goss's Wilt	8

-Excellent tar spot resistance

-Weak on southern rust

Special Features

- ✓ Identity Preserved Production

- ✓ Untreated Seed Available

- ✓ Plant Height Medium Tall
